

Accumulator valve seat

<div class="df_qntext">What is accumulator charging valve?

InstructionsACV-DMO-RVPRODUCT EXPLANATIONThe accumulator charging valve is designed for installation in an open center hydraulic system between the pump and the downstream secondary hydraulic devices. The accumulator charging valve supplies oil on demand to

<div class="df_qntext">What are the components of accumulator charging valve?

The main components of the valve are a body and a mechanically self-operated two-stage pressure-unloading cartridge. The accumulator charging valve is a cartridge unit with a seated pilot stage and a spool-type main stage and leak-free ball-type pilot stage.

<div class="df_qntext">Where is the accumulator charging valve located?

The accumulator charging valve is designed for installation in a system with a fixed displacement pump and is located between the pump and downstream secondary hydraulic devices. The accumulator charging valve receives a load sense signal from the steering valve.

<div class="df_qntext">Where are accumulator gas valves made?

High quality Schrader type gas valves for accumulator charging, up to 10,000 PSI, made in US. Accumulator Nitrogen charging gas valves, high pressure Schrader type 3,000-10,000 PSI. Made in USA.

<div class="df_qntext">What are accumulator charging flow rate and relief valve setting?

The accumulator charging flow rate, upper and lower accumulator pressure limits and relief valve setting are set at the time of manufacture. End user must provide proper maintenance of valve, should it become inoperable, by replacing the valve or servicing it with the proper repair kit.

<div class="df_qntext">How does a load sensing accumulator charging valve work?

MN-LSPRODUCT EXPLANATIONThe load sensing accumulator charging valve operates in a low and pressure on demand system. The charging valve senses the pressure in the accumulator(s). If pressure in one or both accumulators is below a specified pressure range the charging valve sends a pressure signal to a pressure

PRODUCT EXPLANATION The load sensing accumulator charging valve operates in parallel to a steering modulating valve that has a dynamic load sense bleed orifice. The load sense line from the ...
