

# After-sales strategy for solar container products

<div class="df\_qntext">What is the core business of after sales?

This study led to the conclusion that spare parts, maintenance and diagnostics are the core business of after sales and are in fact the main target of the companies when developing or improving their after sales strategy. Moreover, the most common approach for offering after sales services is through maintenance contracts.

<div class="df\_qntext">How to improve the after sales service?

The second most frequent way is active sale of spare parts. The study allowed the improvement of the after sales service and to achieve some conclusions that may be useful to other companies that are interested in improving their after sales services.

<div class="df\_qntext">How do companies market solar?

Companies must market solar. Client communication, information, and connection are key to business growth. Sell your solar project experience and cater to your target market to succeed in a fast-growing industry like solar. Understanding the solar industry and client preferences requires market research.

<div class="df\_qntext">What are solar marketing strategies?

Solar marketing strategies engage target audiences by advertising and explaining solar products, services, and solutions. It includes a variety of strategies, including search engine optimization, social media marketing, content production, and much more.

<div class="df\_qntext">How can a solar marketing campaign help your business?

Understanding the solar industry and client preferences requires market research. Knowing your target allows you to speak their language and provide content they like, especially when selling solar power options. With a well-planned solar marketing campaign, you can capitalize on the solar industry's huge potential and attract customers.

<div class="df\_qntext">Are after sales services a big asset?

The services provided to support the customer in after sales issues were not a big asset. The after sales services provided were mainly spare parts supply, diagnostics, and, more rarely, spare parts replacement.
