

Automatic solar container of the wall clock at night

<div class="df_qntext">How do solar clocks work?

Our solar clocks can be added to an existing KRONOSync master clock system or can be used as a standalone GPS clock. Either model will display accurate time all the time. As a standalone clock the clock will use GPS as its time source. The GPS antenna is mounted on the top of the clock. This permanent antenna mount makes for a simple installation.

<div class="df_qntext">How to setup a solar clock?

The setup of the clock is simple. When you receive the solar clock all you have to do is put it out in the sun for a short period of time and then turn the switch to the on position. The stainless steel frame of the solar clock makes it a highly attractive clock for any environment.

<div class="df_qntext">What are innovation wireless solar clocks?

Innovation Wireless Solar Clocks are the perfect solution for providing exact second time in any and all outdoor applications.

<div class="df_qntext">What time does the clock automatically adjust for Daylight Savings Time?

The 2:00 A.M.time is also when the clock will automatically adjust for daylight savings time. Our solar clock is maintenance free and does not require any electricity to operate. The clock is completely waterproof and requires minimal sunlight to operate.

<div class="df_qntext">Is the clock waterproof?

The clock is completely waterproofand requires minimal sunlight to operate. We have engineered our large 24? clock to operate on a battery that stores power during the day. This allows the clock to operate 24 hours displaying accurate GPS time. The clock can be placed in any time zone in the United States of America.

<div class="df_qntext">How does a GPS clock work?

Once the set button has been pushed the clock will set its hands to the 12:00 o'clock position and then receive the GPS signal and move its hands to the correct position. Then everyday at 2:00 A.M. the clock's receiver module will open and get a time update via the GPS antenna to ensure that the clock displays accurate time.
