

<div class="df\_qntext">What is Azerbaijan's energy potential?

According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually. Azerbaijan's Renewable Energy Agency under the Ministry of Energy (formerly SAARES) states that the country has up to 800 MW of geothermal energy potential.

<div class="df\_qntext">How can Azerbaijan improve energy security?

Diversifying and improving the energy capacity of the country to ensure energy security. Azerbaijan has significant untapped renewable energy potential, as it is a relatively sunny and windy country, and it also has sizeable hydro, biomass and geothermal resources.

<div class="df\_qntext">Why should Azerbaijan invest in solar & wind projects?

Today's groundbreaking of Masdar's and SOCAR's jointly developed solar and wind projects represents a significant milestone in Azerbaijan's energy journey. These initiatives underscore our commitment to diversify our energy sources and advance our sustainable development goals.

<div class="df\_qntext">What is Azerbaijan & Central Asia green energy week 2025?

Backed by strong natural resources and growing international interest, the region is poised to play a key role in the global energy transition. To support this momentum, we're excited to host the Azerbaijan & Central Asia Green Energy Week 2025 on September 25-26 in Baku, bringing together leaders to explore new opportunities and partnerships.

<div class="df\_qntext">Why should Azerbaijan build 3 GW power stations?

Laying the foundation of 3 stations with a capacity of 1 GW is not only a first in the field of green energy in Azerbaijan, but also a bright indicator of our solidarity and commitment to the energy transition for the sake of the green world as COP host countries.

<div class="df\_qntext">What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

However, Azerbaijan must maintain regulatory stability and offer attractive incentives to sustain investor confidence. A significant part of Azerbaijan's renewable energy strategy involves ...

However, Azerbaijan must navigate the technical and geopolitical challenges of building and maintaining these cross-border infrastructure projects. As of October 2024, Azerbaijan's ...
