

Bill gates s power storage

<div class="df_qntext">Will energy storage be a priority for investors?

A report from Reuters Events, released Dec. 11, said increasing power generation from renewable resources and rising use of electric vehicles will make energy storage a priority for investors in the coming years. The report said storage technology will continue to play a major role in the energy transition as cleaner energy replaces fossil fuels.

<div class="df_qntext">Why is energy storage important?

Le Scornet, a former global marketing executive for GE Renewable Energy, said, "As you know, energy storage helps mitigate these problems by storing excess electricity produced during periods of high generation and releasing it when demand is high.

<div class="df_qntext">Will energy storage become a priority technology in 2024-2026?

Respondents to a survey of hundreds of energy industry professionals earlier this year said "energy storage will become the priority technology in 2024-2026," with 43% of respondents "stating that their organization planned to invest in the technology within the next three years," according to Reuters. 2.
