

Bnp paribas solar container manufacturer

<div class="df_qntext">Are BNP Paribas a low-carbon energy producer?

This includes hydroelectric,solar,wind,and,to a lesser extent for BNP Paribas,nuclear,all of which emit no greenhouse gases and are therefore low-carbon. The Group aims to ensure that they account for 80% of its financing for energy generation by 2028 and 90% by 2030.

<div class="df_qntext">How BNP Paribas & Solar Impulse work together?

BNP Paribas and Solar Impulse are working hand in hand to accelerate the implementation of solutions that protect the environment in a profitable wayand thus bridge the gap between ecology and economy. Our partnership with BNP Paribas demonstrates that today environmental protection is profitable.

<div class="df_qntext">What is BNP Paribas Solar Impulse venture fund?

Launched in Paris in 2022,BNP Paribas Solar Impulse Venture Fund focuses on scale-up companies developing innovative technologiesto accelerate the ecological transition with Solar Impulse Foundation labelled solutions and a proven commercial traction.

<div class="df_qntext">Does BNP Paribas finance energy production?

In total,financing for energy generation (low-carbon and fossil-based) accounts for less than 3%of BNP Paribas' total loans to the economy. The Bank is therefore not particularly dependent on the energy production sector,and the pace of its loan portfolio's transition is mainly linked to the real economy's transformation capabilities.

<div class="df_qntext">How does BNP Paribas support the energy transition?

To support the energy transition,the BNP Paribas Group relies in particular on the Paris Agreement Capital Transition Assessment(PACTA) methodology.

<div class="df_qntext">What are BNP Paribas' energy financing stocks?

This category first includes renewable energies, whose share of BNP Paribas' energy financing stocks is already higher than that of all fossil fuels; it also includes nuclear energy. The 80% target of financing going to low-carbon initially set for 2030 has been moved forward to 2028, with a goal of 90% by 2030.
