

# Bratislava solar container subsidy policy adjustment document

<div class="df\_qntext">How will the Slovak climate Act affect the renewable sector?

The Slovak Climate Act will have a positive impact on the renewable sector as it aligns the legislative framework of the Slovak Republic with that of the European Union, bringing Slovakia closer to achieving its climate goals and contributing to climate neutrality in Europe.

<div class="df\_qntext">How has solar technology changed in Slovakia?

For the second consecutive year, Slovakia has witnessed notable acceleration in the solar PV sector. This growth has been primarily driven by the declining cost of solar technology, coupled with relatively high energy prices faced by businesses, which has increased interest in PV systems.

<div class="df\_qntext">How can subsidy models help make balcony solar systems affordable?

Subsidy models play a vital role in making balcony solar systems affordable for you. Governments across Europe have adopted various approaches to incentivize adoption. These models aim to reduce upfront costs, simplify installation, and encourage renewable energy use.

<div class="df\_qntext">Are electricity prices regulated in Slovakia?

liberalised in 2005 - wholesale price is not regulated. Prices of electricity import and export are fixed on the basis of bilateral contracts between buyer and seller. Since January 2005 volumes of cross-border trades and transmission through Slovakia's transmission system are not limited.

<div class="df\_qntext">How much solar power does Slovakia have in 2024?

At the end of 2024, solar PV market in Slovakia peaked at a cumulative installed power of 1,114 MW. This total is a combination of DC and AC power owing to the fact that until 2022 all data were reported only at DC side and from 2023 onwards new installations are defined at AC nominal inverter output.

<div class="df\_qntext">Do RES-E technologies contribute to Slovakia's renewable electricity mix?

Slovakia has still only 3 MW of installed wind capacity and no existing geothermal plants generating electricity. Both RES-E technologies therefore make a negligible contribution to Slovakia's renewable electricity mix, as shown in Figure 1 below.

Accordingly, the necessary and sufficient condition for an effective subsidy policy is derived. Then, this framework is employed for a case study of the Yiwu-Ningbo container freight corridor. The results ...
