

Brazil's solar container radiator quality inspection requirements

<div class="df_qntext">When do photovoltaic products need to be registered in Brazil?

From July 1, 2011, all photovoltaic products entering the Brazilian market need to pass relevant testing and be registered with INMETRO. After six months (from January 1, 2012), manufacturers and importers in the Brazilian market and the photovoltaic products sold shall be subject to relevant testing and registration with INMETRO.

<div class="df_qntext">What is Brazil's New Energy Regulation & conformity assessment requirements?

Brazil published the Ordinance no. 515, of November 10, 2023 that amends Inmetro Ordinance No. 140, of March 21, 2022, which approves the Technical Quality Regulation and Conformity Assessment Requirements for Electricity Generation, Conditioning and Storage Equipment in Photovoltaic Systems.

<div class="df_qntext">What are the requirements for a product certification in Brazil?

For most products entering the Brazilian territory, they must fulfil product regulations as stipulated by National Institute of Metrology, Standardisation and Industrial Quality (INMETRO). The INMETRO conformity mark is applicable to both voluntary and mandatory certification programmes.

<div class="df_qntext">What are the requirements & procedures applicable in Brazil?

We fully understand the local requirements and procedures applicable in Brazil. Mandatory testing and certification are required for certain regulated product categories. Testing must be performed by a Product Certification Body that is accredited by INMETRO. Initial and follow-up factory inspections are required for mandatory certification.

<div class="df_qntext">What certifications do PV modules need in Brazil?

Manufacturers of PV modules seeking legal access to the Brazilian market must obtain INMETRO certification. This certification is essential for each module type or product line that undergoes the same manufacturing process. The Brazilian standards applicable to PV modules are akin to and tested in accordance with the corresponding IEC standards.

<div class="df_qntext">Does TÜV SÜD comply with Brazilian requirements?

TÜV SÜD has the experience and capability to support manufacturers in attaining compliance with Brazilian requirements and obtaining the necessary approval. Minimum Energy Performance Standards (MEPS) are required for some products. Mandatory energy efficiency labelling is required for certain products.

This comprehensive guide provides insights into Brazilian customs duties, detailing their significance in international trade, duty rates for imports and exports, required documentation, ...
