

Is energy storage a hazard?

Data Values

<div class="df_qntext">Are campfires allowed in a forest?

The general rule forbid campfires during the main summer period, but if there's a heat wave or another reason why the forest is dry, the local municipalities may even ban grills, gas burners and camping stoves as well.

<div class="df_qntext">How does experience storage work?

Experience Storage is an add-on that allows you to store large amounts of XP points and transport them through pipes. How does it work? Blocks: The XP tank stores XP points, not XP levels. And how many points can be stored? Around 2,920 XP points, which are equivalent to 40 levels if the player has 0 XP levels.

<div class="df_qntext">Is energy storage a hazard?

By its very nature, any form of stored energy poses some sort of hazard. In general, energy that is stored has the potential for release in an uncontrolled manner, potentially endangering equipment, the environment, or people. All energy storage systems have hazards.

<div class="df_qntext">Can you start a campfire in Your Own Backyard?

Despite the general campfire ban, you are usually allowed to grill or even start a small campfire in your own back yard. This is because you will be more capable of controlling the fire in these situations, and can bring a garden hose close to the campfire to easily stop a fire from spreading.

<div class="df_qntext">Can a forest fire start from a campfire?

Many municipalities will also have designated campfire spots. These allow for year-round campfires, and are set up in safe places that will make it extremely unlikely that a forest fire will start from it. However, even these can be illegal to use if there's a forest fire warning going on.

<div class="df_qntext">Can you start a campfire during the general camping ban?

Some times and areas where you can start a campfire even during the general camping ban is: It's bare mountain /rock with no vegetation around to catch fire. It's snow cover on the ground. It's on sand, with no vegetation to catch fire close by. There has been a huge amount of precipitation lately.

I could do that in World Anvil, with far more opportunity for customisation than I had in Blaze. If I didn't want the public, online component, OneNote would be good enough for it. Charts would be harder, ...
