

Why are solar energy projects being halted in China?

<div class="df\_qntext">How much solar energy did China install in 2017?

In the first nine months of 2017, China saw 43 GW of solar energy installed in the first nine months of the year and saw a total of 52.8 GW of solar energy installed for the entire year. 2017 is currently the year with the largest addition of solar energy capacity in China.

<div class="df\_qntext">How big is China's solar energy capacity in 2020?

In 2020, China saw an increase in annual solar energy installations with 48.4 GW of solar energy capacity being added, accounting for 3.5% of China's energy capacity that year. 2020 is currently the year with the second-largest addition of solar energy capacity in China's history.

<div class="df\_qntext">Why are solar energy projects being halted in China?

The government incentives have also contributed to the curtailment of solar energy, as many of the solar projects have been built in northern and western regions of China where there is a low demand for electricity and a lack of infrastructure to transfer energy towards China's main power grid.

<div class="df\_qntext">How much solar did China add in 2022?

China added a total of 87.41 GW of solar in 2022, up 62% from the year before. As producers rushed to gain the last access to subsidies ending by June 2025, China set a monthly record of 93 GW of new solar capacity in May 2025.

<div class="df\_qntext">How much solar power does China have in 2025?

Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

<div class="df\_qntext">Will China have a solar power market by 2040?

According to the prediction of IEA, Fig. 2 shows that by 2040, the installed capacity of solar photovoltaics is expected to exceed wind, accounting for 22% of China's total electricity capacities. It indicates the great potential of China's solar power market. Fig. 2.

China's photovoltaic (PV) industry has undergone dramatic development in recent years and is now the global market leader in terms of newly added capacity. However, market diffusion and ...
