

# Gs certification for solar container equipment

<div class="df\_qntext">What does the GS mark certify?

The GS mark certifies compliance with all the statutory requirements of the German Product Safety Act. It is a voluntary certification mark applied to finished products that signifies their tested safety.

<div class="df\_qntext">What is a GS test certificate?

The testing and certification body monitors that only products corresponding to the type and the law are placed on the market (production monitoring). If a manufacturer meets these requirements, a GS test certificate is issued. The GS mark is based on the German Product Safety Act (Produktsicherheitsgesetz, ProdSG).

<div class="df\_qntext">Why is GS certification important?

GS certification helps manufacturers to differentiate their products and safeguard their market reputation. GS Mark services by T&#220;V S&#220;D certify product safety to German standards, building trust and global recognition. Contact us to ensure your product complies.

<div class="df\_qntext">What is GS mark verification?

As GS Mark verification is done by a third-party testing and certification organisation, it is more highly regarded than the CE Marking. This minimises manufacturers' risk of product liability, giving them confidence that their products are high quality, safe, and legal.

<div class="df\_qntext">What are the benefits of GS mark Certification?

Manufacturers choosing GS Mark certification benefit from: Applicable to both consumer products, as described in Section 2 No. 26 of the ProdSG, and work equipment, the mark assures consumers that a product can be used safely and without danger, providing it is used as intended.

<div class="df\_qntext">What does the GS mark cover besides electrical safety?

The GS mark covers chemical and hazardous material use, ergonomics, and noise, besides electrical safety. The scope of the GS mark also includes an evaluation of a manufacturer's factory production.
