

# Hand crank solar container lamp

<div class="df\_qntext">Why should you buy a solar & hand crank camping lantern?

Our solar and hand crank camping lantern is here to solve your problem. We provide a USB charging port to meet regular USB charging need, also equipped with a solar charging panel to soak up the sun's rays for extra run time, and hand crank dynamo inside the electric light for recharging your lamp in the field without a power source on occasion.

<div class="df\_qntext">Does a solar hand crank lantern light up the night?

Mesqool Solar Hand Crank Camp Lantern Lights up Your Night! A quality camping lantern is essential to any great camping trip. After the sun goes to sleep, the stars come out to play--and with a lantern, you can, too. Our rechargeable solar lantern is what you need to light up the night for you. USB charging port to meet your regular charging need.

<div class="df\_qntext">Are solar camping lanterns rechargeable?

Given the fact that most normal lanterns are only powered by batteries and based on market feedback, we produce the rechargeable solar camping lantern with a hand crank that can be operated in three ways: USB charging cable, solar panel and hand crank to meet more users, need even in the darkest, remote powerless situation. Excellent features:

<div class="df\_qntext">How to charge a LED camping lantern?

Charging the hand crank must be done at a speed of 2 laps per second. It will generate 300-350mA current. The rechargeable LED camping lantern offers you two operating modes - a lantern or a normal torch, which are also easy to change with the folding design.

<div class="df\_qntext">What is a rechargeable solar lantern?

Our rechargeable solar lantern is what you need to light up the night for you. USB charging port to meet your regular charging need. Built-in solar charging panel for you if you spend a lot of time camping in remote locations. Hand crank dynamo inside the lantern to provide energy under any emergencies.

<div class="df\_qntext">Are hand crank lamps battery-free?

Although hand crank lamps and flashlights are often marketed as battery-free, most have a tiny battery built in - this is required to hold the charge you generate when turning the handle and then release it when you use the light. Most flashlights have either a NiMH or lithium-ion battery, but some have a capacitor.

Two fold-away handles make the flashlight of the hand crank lantern convenient to hang, carry and hang on tents or outside branches or on backpacks and are perfect as survival kits for hurricanes, ...
