

<div class="df_qntext">Did a battery container catch fire again at SunCycle?

A battery container has caught fire again at SunCycle, a solar and storage service company located in the German state of Thuringia. The fire marks the third time in two months that fire services were called to the site for a lithium battery fire on Sunday, August 11. Police again suspect a technical defect as the cause of the fires.

<div class="df_qntext">What happened to a battery storage unit at SunCycle?

This is the third fire involving a battery storage unit stored at SunCycle since June 7th. The first time, the damage was estimated at around 700,000 euro, and similar toxic air warnings were also issued to residents. The second fire was a battery container that went up in flames on June 30th.

<div class="df_qntext">How safe is Huawei's ESS (container A)?

The manufacturer also reported a slow fault progression as one of the product's key safety features. The test showed that Huawei's ESS (container A) delayed fire ignition for seven hours in extreme scenarios, even as the number of thermal runaway cells increased.
