

How much is the subsidy for bucharest solar container project

<div class="df_qntext">Does Romania offer a grant scheme for wind & solar power?

Home » News » Renewables » Romania launches EUR 458 million grant scheme for wind, solar power Power producers in Romania have until May 31 to apply for a total of EUR 457.7 million in state support for wind and solar power plants.

<div class="df_qntext">What is a battery energy storage scheme in Romania?

The aim of the scheme is to support investments in battery electricity storage facilities, allowing for a smooth integration of renewable energy coming from wind and solar sources in the Romanian power system. Under the scheme, the aid will take form of a direct grant to projects selected through a competitive bidding process.

<div class="df_qntext">How much state support does Romania have for wind and solar power?

Electricity producers in Romania have until May 31 to apply for a total of EUR 457.7 million in state support for the construction of wind and solar power plants with or without storage.

<div class="df_qntext">Will Romania support the construction of electricity storage facilities?

Following the positive assessment of the Romanian Recovery and Resilience Plan, the Commission has approved a EUR 103 million Romanian scheme to support the construction of electricity storage facilities.

<div class="df_qntext">How much does a kWh subsidy cost?

The initial estimate for the subsidy is EUR 0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily involved in the analysis of the scheme until now.

<div class="df_qntext">Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.
