

How to connect the meter of the home solar container system

<div class="df_qntext">How does a utility meter connect to a solar panel?

There is an ALTERNATIVE UTILITY CONNECTION called a "Supply or Line Side" connection. This connection is made BEFORE the main breaker. A junction box is added between the utility meter and the main service panel. Then the wires from the utility meter, the main breaker panel, and the PV solar are connected in the junction box.

<div class="df_qntext">How does a solar meter wiring work?

As you can see in the solar meter base the wiring actually looks backwards. The wires in the top terminal go out to the solar panels and the wires on the bottom terminals go back and tie in to the utility. A fused disconnect is always used and goes out to the solar panels.
