

How to view the automatic solar container device of the ring main unit

<div class="df_qntext">What is a smart ring main unit?

Schneider Electric UK's smart ring main unit (RMU), with its innovative conditional monitoring sensors, offers an effective solution for you to stay in tune with the evolving confrontations in electrical distribution. The smart RMU is seamless to purchase, install, and maintain. The design offers unparalleled outdoor durability.

<div class="df_qntext">How do I view the performance data of a solar inverter?

Tap Performance Data to view the performance data curve of the solar inverter. Enter the password for logging in to the app, and tap OK. After logging in to the app, you can view the running details of the connected solar inverters on the home screen.

<div class="df_qntext">What is a smart ring main unit (RMU)?

Seamlessly integrated with the Easergy T300 remote terminal unit (RTU) and our innovative conditional monitoring sensors, the smart ring main unit (RMU) is an innovative solution that makes it easier for you to answer the evolving challenges of electrical distribution.

<div class="df_qntext">How do I connect a solar inverter to a management unit?

The solar inverter can connect to the upper-layer management unit over the Modbus RTU, SunSpec, or AVM protocol. Set the communications address of the SUN2000 when it connects to the upper-level management unit, which should not conflict with the addresses of other devices on the same bus.

<div class="df_qntext">How to connect a solar inverter to a phone?

The USB data cable is delivered with the phone. The port type of the USB data cable connected to the solar inverter is USB 2.0. The user accounts that can log in to the app are classified into common users, special users, and advanced users. You can set different user permissions based on the responsibilities of PV plant operation personnel.

<div class="df_qntext">How do I enable string access detection on my solar inverter?

On the home screen, choose Maintenance > String Access Detection and set PV string access detection parameters. String Access Detection is set to Disable by default. After solar inverters are connected to the power grid, set String Access Detection to Enable.
