

Iraq's new solar container project policy

You know, Iraq's been facing an energy crisis for decades. With power shortages affecting 40% of households during peak demand and industries losing \$4.7 billion annually in productivity, it's not ...

As electricity demand rises--particularly in Iraq's southern regions--the Oil Ministry is working closely with the Ministry of Electricity to implement a national renewable energy plan. The ...

Iraq is planning to generate between 20 and 25 percent of its electricity from renewable sources by 2030. These new solar power projects are steps toward that target. In addition to the ...

The Iraqi Ministry of Oil has signed a partnership agreement between Qatari QatarEnergy and French TotalEnergies to develop a 1.25 GW solar project linked to the Gas Growth ...

Iraq's grid faces a 54-gigawatt summer crunch, but a 2-megawatt solar plant at Baghdad's Government Palace and 97.5 megawatts for ministries signal hope. Can solar projects like ...

Ziyad Ali Fadel, Iraq's Minister of Electricity, has stated that his ministry plans to add 1.75 GW of solar energy to the national grid as part of the government's energy strategy. He said that ...

Remember, in Iraq's energy race, the tortoise (slow but steady) often beats the hare. Build relationships, adapt to local needs, and those container orders will flow like the Tigris River in spring.
