

<div class="df_qntext">Are Italian solar projects relying on overseas supply chains?

While this has indicated significant growth in interest in the Italian solar sector - the previous auction held prior to the implementation of the FER X decree saw just 321.6MW of solar capacity awarded - concerns remain about these projects' reliance on overseas supply chains, particularly those from China.

<div class="df_qntext">What is Italy's latest solar auction?

Italy has released the results of its latest solar auction, which includes 273 expressions of interest for a combined capacity of 3,161MW.

<div class="df_qntext">Which countries exclude photovoltaic panels from tenders?

It is the first measure, not only in Italy but also in Europe, that excludes photovoltaic panels and their components manufactured or assembled in China from the tenders.

<div class="df_qntext">What is a solar PV auction?

This auction seeks to promote PV projects which use non-Chinese-made solar cells, modules and inverters and at least one other component of a solar system (i.e. tracker, solar glass or foundation). This second tender seeks up to 1.6GW of solar PV capacity, with a minimum of 200MW allocated.

<div class="df_qntext">How much of the photovoltaic quota is reserved for a special auction?

Up to 20% of the photovoltaic quota is reserved for a new special auction, where modules, cells, inverters, and at least one other component must meet the "not from China" requirement (EU Regulation 2025/1178). "It is not yet known when the tender will be launched.

<div class="df_qntext">What is a second solar PV tender?

This second tender seeks up to 1.6GW of solar PV capacity, with a minimum of 200MW allocated. Expressions of interest will be open from 16 September 2025 until 26 September 2025. Details for the auction can be accessed here (in Italian).

Recently, the Italian Ministry of Environment and Energy Security has launched a new round of bidding for agrivoltaic projects. This bidding, implemented by the Italian energy management ...

Italy's second solar auction under the transitional FER X incentive scheme will be finalized in mid-November. Projects over 1 MW in size will have to be built with modules, cells and...

In 2024, global Mobile Solar Container Modules sales reached approximately 49.1 k units, with an average global market price of around \$16,000 per unit. The production capacity of Mobile Solar ...

Italian new solar container module bidding

The solar container is lifted using the corner corners in the roof frame. With these in the base frame, the module can be fixed and secured during transport using the twist-lock system. The solar rail system ...

In 2024, utility-scale solar installations surged by 163% year-on-year to exceed 3GW, according to national trade association Italia Solare. This growth trend, coupled with the massive ...

SunContainer Innovations - The Lome photovoltaic module project bidding represents a critical opportunity for contractors and suppliers in West Africa's booming solar energy sector. With Togo ...

At the end of August this year, the Italian government announced the implementation of the "FerX Transitional Decree," excluding Chinese-made photovoltaic products and components ...

What factors are driving the adoption of photovoltaic module solar container solutions in off-grid and remote applications? Declining costs of photovoltaic technology and energy storage systems form the ...
