

<div class="df_qntext">Where is ferrochrome made?

Our Ferrochrome business area runs the chrome mine in Kemi and ferrochrome smelter in nearby Tornio, Finland. Our clean and sustainable ferrochrome is a competitive advantage for us. As chrome is what makes steel stainless, we have traditionally used our ferrochrome mostly by ourselves.

<div class="df_qntext">What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

<div class="df_qntext">How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130 kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

<div class="df_qntext">What is a solarfold container?

The solarfold Container is an immaculately-detailed and sophisticated plug & play system for a wide range of applications. The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants.

<div class="df_qntext">How does solarfold work?

With Solarfold, you produce energy where it is needed and where it pays off. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and mobile operation.

<div class="df_qntext">How does JFE mineral manufacture ferrochrome?

JFE Mineral manufactures carbon-free ferrochrome as an ultra-low-carbon chrome source; produced by a large-scale vacuum furnace process. As a nitriding additive for steel, we manufacture nitrated ferrochrome by a large-scale nitriding furnace process. We also manufacture melt-nitrated ferrochrome by remelting in an induction furnace.

Today, Vargön Alloys operates globally and provides leading producers of stainless and special steels with ferrochrome - the valuable alloy that gives steel its hardness and resistance to corrosion.

For instance, S. K. Nath [21] performed a study focusing on fly ash and ferrochrome slag utilization in geopolymer production. They considered that both additions paved the way for more ...

Manufacture of ferrochrome solar container equipment

The present invention as described above consists of a combination of direct production of carbon-unsaturated ferrochrome grains by solid phase reduction under reduced pressure, melting and ...

Using a unique manufacturing process, JFE Mineral supplies high purity metallic chrome with purity exceeding 99.5% as a chrome source for superalloys, mainly for use in aircraft.

We are a professional manufacturer of integrated solar container systems. SolaraBox solar containers enable customers to achieve greater energy independence and reduce carbon emissions. By ...

Yildirim Group, which owns chromium ore and HC ferrochrome assets in four countries (Turkey, Kazakhstan, Sweden and Russia) announced its intention to progress plans for the ...

Yildirim Group, which owns chromium ore and HC ferrochrome assets in four countries (Turkey, Kazakhstan, Sweden and Russia) announced its intention to progress plans for the construction of a ...

A packaging equipment, medium-carbon ferrochrome technology, applied in packaging, packaging machines, transportation and packaging, etc., can solve the problems of discharge cylinder blockage, ...

Undoubtedly, The major driver for the ferrochrome market is increasing global demand for stainless steel. Ferrochrome is a key alloying component used in the production of stainless steel, and growing ...

Submerged Arc Furnace is an important metallurgical industrial equipment, mainly used for reducing and smelting raw materials such as ore, carbonaceous reducing agent and solvent, and mainly produces ...
