

Offshore oil platform solar container

<div class="df_qntext">What are offshore floating solar plants?

Offshore floating solar plants offer the opportunity to utilize open sea space to provide clean energy solutions to areas with less access to other renewable energy sources, like wind, tidal and wave. While also maximizing energy yields in areas with high solar irradiation.

<div class="df_qntext">What is an offshore solar farm system?

Offshore solar farm systems: abundant, affordable and clean energy for everyone. At Oceans of Energy we create offshore solar farm systems to generate clean and renewable energy. The future of renewables lies at sea.

<div class="df_qntext">Can solar energy be deployed offshore?

With approximately 50% of the world's population residing in coastal areas, the ability to deploy solar energy offshore represents a groundbreaking opportunity. SolarDuck's innovative solutions offer coastal regions and communities around the world access to affordable, renewable, and secure utility-scale solar energy.

<div class="df_qntext">What is offshore solar & how does it work?

Our 'waterlily' technology and our 'learning from the reality' approach resulted in offshore solar farms able to provide clean electricity to the world at a large scale, keeping land space available for housing, recreation, industry, roads, and agriculture. The future of solar- PV is at sea! Offshore solar is a game changer in the energy transition.

<div class="df_qntext">What incentives are available for offshore floating solar?

Governmental incentives provide strong incentives for offshore floating solar solutions within offshore wind tenders. Offshore floating solar plants offer the opportunity to utilize open sea space to provide clean energy solutions to areas with less access to other renewable energy sources, like wind, tidal and wave.

<div class="df_qntext">Which offshore platforms use hybrid power systems?

Operates 13 offshore platforms that use hybrid power systems. Of these, eight monopile platforms, including Caravel, Cutter, L09- L13-FI-1 and Shamrock, use a solar-wind hybrid system. Such systems do not produce any direct greenhouse gas emissions in normal operation,
