

<div class="df_qntext">What is the Global Solar Council?

The Global Solar Council is committed to unlocking the capital needed to drive the solar transition. We work to ensure that solar PV markets around the world--especially in emerging economies--have access to affordable,innovative,and scalable financing solutions.

<div class="df_qntext">Why did the IEA launch the cost of capital Observatory?

For this reason, the IEA launched the Cost of Capital Observatory in 2022, to gather - through surveys - data on cost of capital for clean energy projects in emerging and developing economies. In 2023, we conducted a second survey which includes more countries and technologies.

<div class="df_qntext">Does solar PV cost a government bond?

Both show negative solar PV premiums ranging from -2% to -2.7%,which means that we calculate a financing cost for solar PV that is below the financing cost for the government,i.e.,a 10-year government bond. While there may be cases where this is plausible,it is unlikely for Brazil and China.

<div class="df_qntext">Are solar and storage projects becoming more expensive in 2023?

This trend emerged primarily from the hybrid nature of the projects in the survey, with solar and storage projects increasingly in demand. This year's survey also shows that nine out of 10 respondents expect increases in the cost of capital in emerging and developing economies in 2023. IEA. Licence: CC BY 4.0

<div class="df_qntext">What is the cost of capital Observatory?

The Cost of Capital Observatory is an initiative from the IEA,the World Economic Forum,ETH Zurich and Imperial College London. The aim of the Observatory is to increase transparency in the energy sector and inspire investor confidence,especially in emerging and developing countries where data on financing costs is scarcer.

<div class="df_qntext">How does CAPEX affect a solar PV project?

For the United States,we adjust CAPEX values to account for the Federal Investment Tax Credit (ITC),which indirectly reduces CAPEXof a solar PV project (Krupa and Harvey,2017). The ITC amounted to 30% for the period 2006-2019 and was reduced to 26% for 2020-2022 (U.S. Department of Energy,2021).

The report will provide indicators for a lower cost of capital in investments, flows of international capital and other metrics, as well as recommendations specific to the different sectors ...

Our findings reveal that in almost two-thirds of cases, the weighted average cost of capital (WACC) for utility-scale solar power projects was either the same or lower than those for gas ...

Overseas agency solar container project capital

Based on a new, unique dataset from a global survey, this IRENA report presents unprecedented insights on the cost of capital for onshore wind, offshore wind and solar photovoltaic (PV) projects.

In today's dynamic energy landscape, harnessing sustainable power sources has become more critical than ever. Among the innovative solutions paving the way forward, solar energy ...

Investing in large solar projects aligns with ESG goals, attracting responsible investors. Stable Returns: Solar projects, with their long-term power purchase agreements, provide stable and predictable ...

The International Renewable Energy Agency (IRENA) serves as the principal platform for international co-operation, a centre of excellence, a repository of policy, technology, resource and financial ...

These projects have the potential to significantly reduce greenhouse gas emissions and provide sustainable electricity generation. However, one of the key factors that determine the success and ...

Global investment in solar PV hit a record with USD 554 billion in 2024, up by 49%. Investment in renewable power, grids, and battery storage exceeded fossil fuels investment in 2024, ...

Mali New Energy Lithium Battery Energy Storage Project In cooperation with the start-up Africa GreenTec, TESVOLT is supplying lithium storage systems for 50 solar containers with a total ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...
