

## Power reserve time of seamaster 8500 movement

<div class="df\_qntext">Is the Omega 8500 automatic?

The caliber 8500 features a bidirectional rotor, which means it is automatic. Having a bidirectional rotor means a reduced winding time. The caliber has a power reserve of 60 hours and is, of course, Swiss-made. In the 1970s, the Omega brand retired the 1000 series calibers.

<div class="df\_qntext">Is the Omega 8500 hand windable?

Hand-Windable? The Omega caliber 8500 is an in-house automatic movement. The rotor winds in both directions to reduce winding time. Power reserve of 60 hours. Swiss made. The pictures below are from an Omega Seamaster Aqua Terra Golf Edition and a newer style Planet Ocean XL.

<div class="df\_qntext">Is Omega 8508 a COSC rated automatic movement?

Omega's in-house caliber 8508 is a COSC rated automatic movement equipped with Co-Axial Escapement for "greater precision, stability and durability" according to Omega documentation. The picture above is from an Omega Aqua Terra 150M ( 231.12.42.21.01.001 ). This caliber was originally announced in early 2013.

<div class="df\_qntext">Is Omega caliber 8500 a good watch?

The caliber 8500 series was released in 2007 and has established itself well in Omega's range of watches. Interesting to point out is that Omega caliber 8500s manufactured after 2011 come equipped with the silicon Si14 balance springs. This silicone provides more stability to the movement.

<div class="df\_qntext">What is the Omega calibre 8500?

This series of calibers is the result of half a century of research and development. As such, like many other Omega calibers from that time and onwards, the Omega Calibre 8500 uses the co-axial escapement mechanism, making it much more advanced and efficient than the ETA-based calibers.

<div class="df\_qntext">Which Omega watches fit the Seamaster collection?

To fit the Seamaster collection, the size of the movement was increased by 13% compared to the previous generation which was the caliber 2500 series. The caliber 8500 series was released in 2007 and has established itself well in Omega's range of watches.
