

<div class="df\_qntext">Can a PSO algorithm optimize a PV solar system's parameter?

Conclusion and discussion This study proposed a novel optimization approach for a PV solar system's parameter of a D-MPPT controller, which uses PSO and GWO-optimized PSO algorithms. The optimization performance of both algorithms was compared in terms of speed, convergence, and quality of the solutions obtained.

<div class="df\_qntext">How to optimize a photovoltaic energy storage system?

To achieve the ideal configuration and cooperative control of energy storage systems in photovoltaic energy storage systems, optimization algorithms, mathematical models, and simulation experiments are now the key tools used in the design optimization of energy storage systems 130.

<div class="df\_qntext">What is particle swarm optimization (PSO)?

Particle swarm optimization (PSO) is an important algorithm in the field of swarm intelligence optimization 189. It was proposed by Eberhart and Kennedy based on the social behavior patterns of bird flocks.

<div class="df\_qntext">Can a gwo-optimized PSO algorithm optimize complex models with multiple parameters?

The GWO-optimized PSO algorithm, despite requiring significant computational resources and time for its meta-optimization, has demonstrated its potential as a promising optimization approach for complex models with multiple parameters.

<div class="df\_qntext">What is swarm optimization in photovoltaic energy storage?

In photovoltaic energy storage systems, the key to power scheduling is to maximize energy efficiency and minimize the total cost. Swarm intelligent optimization algorithms such as particle swarm optimization (PSO) and ant colony optimization (ACO) play a key role in the global optimal solution search.

<div class="df\_qntext">What are the limitations of swarm intelligence optimization algorithm in photovoltaic energy storage system?

The application of swarm intelligence optimization algorithm in photovoltaic energy storage system may have the following limitations: premature convergence: swarm intelligence optimization algorithm may converge to the local optimal solution prematurely during the search process, and cannot find the global optimal solution.

Wang et al. [15] used PSO and coordinate search method (CSM) to optimize the performance of a solar-air hybrid source heat pump heating system. The findings highlight the ...

ZOA's performance was examined in four scenarios and compared to four existing MPPT algorithms: Grey

Wolf Optimization (GWO), Particle Swarm Optimization (PSO), Flower ...

Research on multi-objective optimization configuration of solar ground source heat pump system using data-driven approach Peng Li \*, Junyan Cheng, Yilin Yang, Haipeng Yin, Ningbo Zang ...

The present investigation aims at developing a new design framework based on combining FDTD-PSO (Particle Swarm Optimization) numerical simulations, in order to improve the ...

This paper proposes a method for optimizing the capacity configuration of a wind-solar-battery-diesel microgrid using the Continuous Grey Wolf Optimization (CGWO) algorithm.

This paper proposes a hybrid algorithm for capacity configuration optimization of a solar PV-battery-based micro-grid. The hybrid algorithm (BAPSO), which is a combination of Particle Swarm ...

However, particle swarm optimization (PSO) suffers from delayed convergence, more iterations to reach the optimal point, and random parameter selection. Hence, this study employs an ...

Finally, the Particle Swarm Optimization (PSO) algorithm was implemented to optimize the economic indicators and the environmental impact of the thermal configurations. Results showed that the ...

From the perspective of photovoltaic energy storage system, the optimization objectives and constraints are discussed, and the current main optimization algorithms for energy storage...

Finally, the Particle Swarm Optimization (PSO) algorithm was implemented to optimize the economic indicators and the environmental impact of the thermal configurations. Results showed ...

Recent literature in this area is rapidly expanding, reflecting the increasing interest from practitioners, industry, and researchers in green container terminal planning. This highlights the need ...

In thermal-storage photovoltaic-concentrated solar power (PV-CSP) systems, the fluctuant part electricity is stored in thermal energy storage (TES) system instead of high-cost ...

To deal with these problems, this paper proposes an improved container scheduling algorithm, Kubernetes-based Particle Swarm Optimization (K-PSO), for big data applications based ...

We distribute application containers on Docker hosts, balance resource usage, and ultimately improve application performance. Experimental results show that the performance of the ...

PSO is a swarm's movement and intelligent-based optimization technique used to get the optimized solution in multi-objective power system problems [18, 19]. The basic steps of PSO ...

To this end, a number of studies have been conducted to investigate the optimal sizing and configuration of renewable energy systems with energy storage in various contexts, using ...

To deal with these problems, this paper proposes an improved container scheduling algorithm, Kubernetes-based Particle Swarm Optimization (K-PSO), for big data applications based on Particle ...

In this paper, the proposed optimization approach is hybrid between the Grey Wolf Optimizer and the Particle Swarm Optimization, where it is utilized for extraction parameters in single ...

The optimal configuration model of the wind, solar, and hydrogen microgrid system capacity is constructed. A particle swarm optimization with dynamic adjustment of inertial weight (IDW-PSO) is ...

This paper aims to design the MPPT technique using the Particle Swarm Optimization (PSO) method to track the maximum power at the photovoltaic (PV) system. The direct current (DC) ...

To achieve this objective, a new hybrid optimization system that combines Particle Swarm Optimization (PSO) and Genetic Algorithm (GA) is proposed to simultaneously optimize the ...

Multi-Objective Particle Swarm Optimization (MOPSO) is a metaheuristic algorithm that has gained significant attention in the field of optimization due to its simplicity, efficiency, and ...

This research presents an innovative optimization model which employs a Particle Swarm Optimization (PSO) algorithm to address the uncertainties inherent in solar energy generation, ensuring robust ...

Hence, in this paper, an alternative to physical relocation based on particle swarm optimization (PSO) connected modules is proposed. In this method, the physical location of the ...
