<div class="df\_qntext">What are the labeling requirements for photovoltaic (PV) systems?

The National Electrical Code (NEC) Section 690 outlines specific labeling requirements for photovoltaic (PV) systems to ensure safety and compliance. These requirements were updated in 2020. Visibility After Installation: Labels or markings must remain visible after installation, ensuring they can be easily read during maintenance or emergencies.

<div class="df\_qntext">Do I need a label for a solar PV system?

Solar PV labeling has been simplified for the 2017 code version. Here are the labels required by the NEC and/or NFPA 1 for the typical solar installation. NEC 690.13 (B) label is required at each PV system disconnecting means. This will include combiner boxes, AC/DC switches & AC Disconnects.

<div class="df\_qntext">How do I know if my solar installation is safe?

Proper labeling is crucial to warn personnel of these dangers. Key requirements include: Voltage Rating Labels: Labels must indicate the nominal voltage of the solar installation. These should be placed at the main service disconnect, junction boxes, combiner boxes, and inverters.

<div class="df\_qntext">Why is safety labeling important for solar installation?

Proper safety labeling is a critical aspect of solar installation safety, helping to prevent accidents and injuries by clearly communicating potential hazards. By adhering to established standards such as ANSI Z535, NFPA 70E, OSHA's HCS, and NEC 690, solar installers and operators can ensure their systems are safe for everyone involved.

<div class="df\_qntext">Are there any solar labeling kits?

Answered: None Yet! Score: None Yet! Be careful when buying many of the commercially available PV labeling kits. They often have stickers that say "caution solar circuit" instead of "WARNING: PHOTOVOLTAIC POWER SOURCE".

<div class="df\_qntext">What changes are coming to PV labeling - nec2023?

PV Labeling - NEC2023 Changes 110 LOCAL REGULATIONS AND FINAL DRAFT REVISIONS Many adjustments are sure to come as the industry progresses and labeling evolves with the changes to become a standard everyone can define and implement now and in the future.
