EPC stands for Engineering, Procurement, and Construction. It's a project delivery model that oversees the solar installation process from design through to completion. 2. What are the benefits of using an EPC contractor for a solar project?

<div class="df_qntext">What is the second edition of Solarpower Europe's EPC best practice guidelines?

The second edition of SolarPower Europe's Engineering, Procurement and Construction (EPC) Best Practice Guidelines follows the O&M Best Practice Guidelines and is produced through the Lifecycle Quality Workstream. This document is the result of a year of intensive work by over 25 leading solar experts from 20 companies.

<div class="df_qntext">How does the EPC model work for solar projects?

For companies like JMS Energy, managing and delivering extensive solar projects requires a coordinated and efficient approach. The EPC model provides this by consolidating all necessary services into a cohesive process, allowing large projects to proceed smoothly and reliably.

<div class="df_qntext">What is EPC procurement?

During the procurement phase, the EPC contractor sources all the equipment, materials, and services necessary for the project. This stage is crucial, as it directly influences the quality and longevity of the solar installation. Procurement includes purchasing solar panels, inverters, mounting structures, and electrical components.

<div class="df_qntext">What is EPC & how does it work?

Under the EPC model, a single contractor handles every aspect of the project, from initial site assessment and system design to procurement of materials and equipment, as well as the final installation and commissioning of the solar power system.

<div class="df_qntext">What is the EPC model & why is it important?

This approach offers a streamlined and efficient way to ensure all project components align, with minimal disruption and maximum accountability. By centralizing these responsibilities, the EPC model minimizes risks, simplifies project timelines, and often results in cost savings for project developers.
