

Solar container danger sign

<div class="df_qntext">What does a black lightning bolt on a container mean?

The black lightning bolt inside a yellow triangle is a universal sign for electrical hazard, warning workers to handle the container with care and avoid tampering with electrical components unless properly trained. It helps ensure safety during handling, maintenance, and transport. 21. Caution! Cargo Might Fall Out When Door Opens Sticker

<div class="df_qntext">What is a hazard sign?

In Europe and elsewhere in the world (except North America and Australia), this type of sign is used if there are no more-specific signs to denote a particular hazard. When used for traffic signs, it is accompanied by a supplementary sign describing the hazard, usually mounted under the exclamation mark.

<div class="df_qntext">What is a shipping container decal?

Max Gross Weight: The maximum allowable weight of the container including cargo. Size and Type Codes: Indicates the container's dimensions and type (e.g., "20GP" for a 20-foot general-purpose container). What is the Shipping Container Decals ? Decals are durable, adhesive labels applied to the surface of a shipping container.

<div class="df_qntext">What are hazard symbols?

Hazard symbols may vary in color, background, borders, or accompanying text to indicate specific dangers and levels of risk, such as toxicity classes. These symbols provide a quick, universally understandable visual warning that transcends language barriers, making them more effective than text-based warnings in many situations.

<div class="df_qntext">What are container number markings & CSC safety plates?

Container number markings serve as a unique identifier, allowing for efficient record-keeping and tracking throughout the supply chain. CSC safety plates provide essential structural and inspection information, ensuring the container meets safety standards for transport and stacking.

<div class="df_qntext">What are miscellaneous markings on a shipping container?

Miscellaneous Markings on a shipping container refer to various temporary or operational stickers and labels that provide important handling, safety, or regulatory information. These are usually applied for specific shipments and removed afterward. Common types include:

Overview GHS hazard pictograms Chemical warning signage Former hazard pictograms (1967-2017) External linkso The European Union CLP Regulation (for "Classification, Labelling and Packaging") was introduced as EC Regulation 1272/2008. It is based on the GHS system, to secure for "physical, health and environment hazards". o The European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR) fixed harmonised pictograms for transportation. Vehicles carrying
