

# Solar container factory fire

<div class="df\_qntext">Why did Cirencester hybrid solar farm fire?

The recent fire at Cirencester Hybrid Solar Farm is a stark reminder of the risks tied to battery energy storage systems (BESS). As BESS plays a vital role in the clean energy transition, this incident highlights the urgent need for smarter, safer solutions--like immersion cooling--to prevent future disasters.

<div class="df\_qntext">What happened at a hybrid solar farm?

Let's break down the confirmed facts: The fire broke out around 3:00 PM on March 29th. It involved battery energy storage containers located within the hybrid solar farm, not just the solar panels. The blaze quickly escalated, sending thick plumes of black smoke into the sky, visible from neighboring areas and main roads.

<div class="df\_qntext">Are electric vehicles causing a 'battery energy storage fire'?

With the growing number of electric vehicles and batteries for energy storage on the grid, more high-profile fires have hit the news, like last year's truck fire in LA, the spate of e-bike battery fires in New York City, or one at a French recycling plant last year. "Battery energy storage systems are complex machines," Mulvaney says.

<div class="df\_qntext">Does battery storage have a problem with fires?

Battery storage is a key piece of California's clean energy transition. But there's a problem with fires. A fire at Valley Center Energy Storage Facility in San Diego County is the latest in a series of incidents; advocates insist problems will get ironed out in time.

<div class="df\_qntext">What happened at Valley Center energy storage facility in San Diego?

A fire at Valley Center Energy Storage Facility in San Diego County is the latest in a series of incidents; advocates insist problems will get ironed out in time. Addis and two other state legislators sent a letter to the California Public Utilities Commission Thursday requesting an investigation.

<div class="df\_qntext">What are the different types of energy storage failure incidents?

Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C&I) failures. Other Storage Failure Incidents - this table tracks incidents that do not fit the criteria for the first table. This could include failures involving the manufacturing, transportation, storage, and recycling of energy storage.
