Solar water filters can contain sand filter, carbon filter, cartridge filter housing, reverse osmosis system, ultrafiltration system, UV sterilizer accordingly. Here, we explain solar desalination plant with reverse osmosis technology.

<div class="df_qntext">Can a large area filter paper make a solar-thermal water purification system?

The large area filter paper made it possible to fabricate a prototype of a solar-thermal water purification system(Fig. 3a). For this purpose,a freestanding 30 um thick filter paper with dimensions of 37.5 cm × 28.0 cm was positioned and fixed between two 1.5 mm thick borosilicate glass windows.

<div class="df_qntext">What is solar water disinfection?

SODIS: Solar water disinfection,or SODIS,is based on the germicidal effect of UV lightand its synergistic effect with rise in water temperature. The procedure is very user-friendly since it involves just filling a transparent container with water and placing it in direct sunlight for several hours.
