

Solar container installation project recruitment

<div class="df_qntext">How many solar panel installers are there?

Due to the energy transition there is a strong demand for solar panel installers. In 2014 there were less than 6,000 full-time jobs in the solar industry. By 2020, the number of jobs had already grown to almost 25,000. Coolblue alone is already looking for 1,000 installers since they decided to not only deliver the panels but also install them.

<div class="df_qntext">How do I keep my solar panels operational and reliable?

Keeping your solar panels operational and reliable requires professionals with the on-the-job experience and the right skillsets. The technicians we source through our tried and tested staffing solutions enable energy companies to improve their workforce productivity and reduce labour costs.

<div class="df_qntext">How can a solar talent pipeline help your business?

To prepare for future demand and minimise the problems caused by skills shortages, businesses must develop a sustainable solar talent pipeline. Our discipline-specific consultants will talent pool the best personnel in the solar market and make them available for your project or business when you need them.

<div class="df_qntext">Who are solar specialist staff?

From solar manufacturers and installers to storage facilities, our track record has seen us place specialist staff across the full value chain in the solar industry: Manufacturers, Developers, EPC Contractors, Utilities, Operators, Asset Managers, Investors and Consultancies.

<div class="df_qntext">What does a solar farm technician do?

Solar farm technicians are the backbone of a successful solar park, offering critical support for creating, installing, and maintaining your solar panels. Keeping your solar panels operational and reliable requires professionals with the on-the-job experience and the right skillsets.
