

Solar container materials engineering technology undergraduate program

What is the program of undergraduate education in Materials Science & Engineering? The program of undergraduate education in Materials Science and Engineering includes four parts: general education courses, major courses, practical education courses and personalized courses. For major courses, it consists of three parts, namely, fundamental courses, MSE compulsory courses and MSE selective courses.

What courses are offered in Materials Science & Engineering?

Making substantial contribution to science, technology, and society. The program of undergraduate education in Materials Science and Engineering includes four parts: general education courses, major courses, practical education courses and personalized courses.

What is solar energy research & education?

Our research and education in this area focus on increasing the performance of solar cells by developing new materials and structures and designing cheaper methods of manufacturing solar panels. We also do research in PV systems and solar fuels. The following research groups offer graduation projects in the Solar Energy profile:

What courses do you take in Materials Science Laboratory?

First, students are required to take Materials Science Laboratory for their department-wide basic experiment courses. They then proceed to more specialized experiment courses in metallurgical engineering, organic materials engineering, and inorganic materials engineering.

What is Materials Science & Engineering (MSE) of Shanghai Jiao Tong University?

Materials Science and Engineering (MSE) of Shanghai Jiao Tong University is one of the first national key subjects with first level priority in financial support in China.

What is the SJTU undergraduate engineering cluster program in English?

The SJTU Undergraduate Engineering Cluster program in English includes: -The University of Michigan-Shanghai Jiao Tong University (UM-SJTU) Joint Institute (JI) -School of Materials Science and Engineering -School of Electronic Information and Electrical Engineering -School of Naval Architecture, Ocean and Civil Engineering

The undergraduate program, which leads to a Bachelor's Degree in Engineering, concentrates on optoelectronic information science and engineering, and it has an innovative curriculum integrating ...

Make Way for Unimpeded Progress From Molecular Understanding to New Technology High tech wouldn't exist without polymers, ceramics, metals, composites and semiconductors. MSE is linked to ...

Solar container materials engineering technology undergraduate program

2025 SJTU Undergraduate Engineering Cluster Program In English for International Students Founded in 1896, Shanghai Jiao Tong University (SJTU) is one of the internationally recognized, top-tier ...

At CUHK, the undergraduate program in Materials Science and Engineering (MASE) is designed to equip students with cutting-edge knowledge, hands-on experience, and interdisciplinary expertise. ...

The School of Materials Science and Engineering (MSE) has an extensive degree-based scholarship program. Multiple funding options are available for undergraduate students who are pursuing a MSE ...

Materials and Metallurgical Engineering combines engineering, physics and chemistry principles to solve real-world problems in the fields of nanotechnology, biotechnology, information technology, energy, ...

Mission of the Undergraduate Program in Materials Science and Engineering The mission of the undergraduate program in Materials Science and Engineering is to provide students with a strong ...

Now, you can fully study an undergraduate program in renewable energy engineering and design technologies that will also be used in clean energy. Students are developed to gain hands-on ...
