

Solar container orders in the first quarter of 2022

<div class="df_qntext">How many GW of solar modules are shipped in 2022?

In 2022, top four manufacturers each shipped more than 40 GW, at least 20 GW more than the fifth. InfoLink estimated that the top 10 manufacturers shipped around 252 GW of modules, a 166% year-on-year increase. The top four dominated 60-65% of global shipment volume, heightening that the big stays big.

<div class="df_qntext">Who made solar panels in 2022?

The top five module makers in 2022 were Longi, Jinko Solar, Trina Solar, JA Solar, and Canadian Solar. Although Longi slipped to third place in the first half of the year, it delivered actively in the second half, shipping 12-15 GW in a quarter, retaining the lead for three consecutive years.

<div class="df_qntext">Which solar modules are the most shipments in 2023?

M10 (182mm) and G12 (210mm) products together accounted for 81% of shipments by the top 10 module makers (excluding First Solar), with M10 taking up the largest share. M6 (166mm) and other formats accounted for around 14%, and n-type modules 4-5%. Manufacturers set ambitious shipment goal for 2023.

<div class="df_qntext">How many Chinese solar modules are there in 2022?

Solarbe Consulting predicts global newly installed solar capacity to exceed 260 GW in 2022, which means over 90% of the modules have been supplied by Chinese manufacturers. In 2022, the top 10 Chinese manufacturers have shipped over 240 GW modules globally, up 60% and occupying over 90% of global demand, according to the annual ...

<div class="df_qntext">How many solar modules will China ship in 2023?

As many manufacturers have made ambitious ramp-up plans, their shipment targets for 2023 have also seen a substantial increase. Solarbe Consulting's data shows that China's top 10 module producers aim at shipping a total of 400 GW in 2023. This has far exceeded module demands globally, which implies mounting competition in the market.

<div class="df_qntext">Who makes the most solar panels in 2022?
