<div class="df_qntext">Does the EPC 4.0 project save money?

Summarizing the findings in these areas, the EPC 4.0 project came to a savings potential of up to 50% of the total budgeted project costs. A lot of companies in the power sector use Engineering, Procurement, and Construction (EPC) contracts for complex infrastructure projects such as power plants.

<div class="df_qntext">Why are EPC contracts important?

EPC contracts are increasingly being adopted as the most preferred form of private sector delivery mechanism for most large infrastructure projects. EPC contracts have significant importance when it comes to delivering renewable power projects because they lead to the effective management of the engineering, procurement, and construction phases.

<div class="df_qntext">Is a contract price a factor in the bankability of a solar project?

Price is also a consideration but is usually considered separately from the bankability of the contract because the contract price (or more accurately the capital cost of the solar facility) relates to the bankability of the project as a whole.
