

Tokyo solar container power station epc unit

<div class="df_qntext">How does EPC work?

In the EPC (Engineering, Procurement and Construction) of solar power plants, we design the selection and layout of the equipment to suit the characteristics of the site to maximize the amount of power generated, as well as the civil engineering, cabling and power transmission. We use our global purchasing network to source the equipment needed

<div class="df_qntext">What is Yanmar power EPC?

Yanmar Power EPC offers all the turnkey solutions required for a project or power plant.

<div class="df_qntext">Who owns Chita thermal power station units 7 & 8?

(Image: JERA) JERA and Toho Gas established Chita Energy Solutions, a 75:25 joint venture that will own and operate Chita Thermal Power Station Units 7 and 8, and signed an EPC contract with Toshiba Energy Systems & Solutions, Toshiba Plant Systems & Services, and Taisei Corporation, JERA announced on February 4, 2025.

<div class="df_qntext">Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

<div class="df_qntext">Where are solar power plants made?

Headquartered in Shanghai with 50,000m²+ production bases across Jiangsu, Zhejiang, and Guangzhou, the company employs 1,000+ professionals, including 20+ engineers driving energy storage technology. ISO/TUV/CE-certified units deliver rapid-deploy solar power for off-grid, emergency, and mobile applications, reducing emissions by 70% vs diesel.

<div class="df_qntext">How to choose an EPC contractor?

To ensure quality, the owner must select an experienced EPC contractor. A third-party or in-house consultant can verify the design of major structures and inspect the main equipment installations. Changes in scope of work can affect project schedule, cost and risk. Such changes are the responsibility of the owner.
