

What material is the solar container fire fighting system made of

<div class="df_qntext">Which fire-fighting systems are suitable for container ships?

For the protection of cargo holds of container ships, only fixed gas (CO₂ or inert gas) fire-fighting systems have been admitted by the relevant rules so far. The rules also indicate that the systems accepted by administrations as satisfactorily equivalent to the gas system for the performance can be adopted as its alternative.

<div class="df_qntext">What are the requirements for a container hold fire?

Pumps, piping, materials and any electrical systems are to be in accordance with the applicable requirements of Part 4 of the Marine Vessel Rules. Be located in a position that would be readily accessible during a fire in the container holds. Not to be rendered ineffective by the heat of a container hold fire.

<div class="df_qntext">What are self-contained firefighting units?

These self-contained units, housed in a 10-foot ISO standard container, offer superior firefighting capabilities. They come with options for integrated foam and priming systems, ensuring a comprehensive solution for emergency responses.

<div class="df_qntext">How can a hydropen system fight a container fire?

Finally, there's a faster, safer and more efficient way to directly fight container fires on board vessels. The HydroPen system makes it possible to directly extinguish container fires at heights, at deck and below deck on board cargo vessels. No other solution can do that.

<div class="df_qntext">What is a deck foam fire-fighting system?

At present, the deck foam fire-fighting system is the only solution to satisfy these multiple requirements. Our deck foam fire-fighting system is called "Air-foam system", agitating and aerating the streams of the foam liquid and seawater in the piping by what is called "jet effect" to generate foam.

<div class="df_qntext">What is considered essential during a fire in a container hold?

A machinery space, service space, accommodations space or any other space that may be manned. Any space that could be essential in fighting a fire in a container hold. Any tank containing combustible liquids. A list of the systems and equipment considered essential during a fire in a container hold is to be developed and submitted for reference.

A new DNV GL class notation attests to special fire detection and firefighting measures implemented on board a containership. The notation was first given to the 23k class MSC FEBE, the ...

In principle, the system has the same structure as the foam system for Ro-Ro spaces of car carriers with its foam generators attached to ventilation ducts in cargo holds.

What material is the solar container fire fighting system made of

TLS Energy International's flagship offering is the fully integrated BESS container, a turnkey solution that encompasses advanced cooling systems, state-of-the-art fire fighting systems, efficient DC ...

The container where the fire originates is difficult to identify and to reach due to cargo hold or cargo deck area congestion. The options for fire-fighting are therefore quite limited since the only fixed fire ...

Unlike standard containers, TLS Energy's BESS containers are equipped with essential components such as HVAC systems, fire fighting systems, and efficient lighting. This integration ensures that the ...

This Guide replaces the existing Guide for Fire-Fighting Systems for On-Deck Cargo Areas of Container Carriers. This Guide is for the use of designers, builders, owners and operators in ...

While the basic SOLAS requirements are incorporated by reference in the ABS Rules for Building and Classing Marine Vessels (Marine Vessel Rules), this Guide has been developed to provide for further ...

Our focus Matre's portfolio of systems and equipment for firefighting includes several innovative, effective and reliable solutions of foam systems used on industrial, marine and offshore installations. All our ...
